FOR IMMEDIATE RELEASE-

Enhanced Professional Services for Data Storage Responding to client needs – we deliver

Tinton Falls, NJ: October 6, 2011- Storage Engine, Inc. (SEI), announced the addition of their new-enhanced services being offered by its Professional Storage Practice, developed for enterprises needing additional services in their changing environments. As data needs become more complex and onerous to in-house IT staff, SEI's skilled Professional Service Engineers can assist, augment, or handle data services without disrupting the business operations of any enterprise. SEI engineers have a wealth of experience and certifications to ensure a quick, complete and successful result every time.

Physical to Virtual Server Migrations

Today SEI's Professional Services Practice provides specialized talent to a large and growing number of enterprises. This year alone, SEI's Professional Services revenues have doubled over prior years, attesting to the needs of specialized data storage Professional Services to handle the growing data storage complexities for enterprises with local, physical to virtual migrations, remote or cloud storage. The benefit that SEI has is that we are vendor agnostic and will deploy a great team of skilled professionals ready to address any of your data storage needs. Even the most stubborn data problems can be resolved. Users are increasingly relying on SEI Professional Services for troublesome areas: task completion within the time constraints, workload demands and staff limitations.

SEI strong and capable Professional Services organization supports a number of enterprises throughout North America that benefit from the enhanced services that we deliver. A full list of our offerings are:
